FALL PROTECTION PRODUCTS & SERVICES

SOLUTIONS FOR WORKING SAFELY AT ANY HEIGHT.

AIR MILES.

DO YOU KNOW?

Occupational health and safety regulations require every person working at heights to be protected against falling?

At Hercules we practice and understand the need for excellence when it comes to workplace safety. We also know what professionals need. Our extensive line of safety products ranges from basic harnesses and lanyards to industry specific, complex anchorage connectors.

All our products are fabricated and designed to meet and exceed all workplace health and safety regulations as well as CSA, CE, OSHA and ANSI standards and regulations.

TURN KEY SERVICES

Additionally, Hercules can provide you with a number of turn key services that include:

- Design**
- Engineering**
- Installation & Training**
- Certification**
- Annual Inspection**
- SRL Repair & Service**

OUR BRANDS

Fall Protection

The Safety Company

Remember, many injuries and fatalities in the workplace are due to falls. These are preventable with the use of proper fall protection equipment and fall protection training for workers. Contact your Fall Protection Specialists at Hercules SLR today for more information on how we can help make your work site safer.

PRODUCT OVERVIEW

Safety and Comfort. Our lightweight safety harnesses offer security without compromising comfort.

- Class A
- Class P
- Class E
- Class L
- Class D Descent
- D-Ring Extension
- Suspension Trauma Strap

SAFETY HARNESSES

Safety Lanyards are a workers vital link to their fall protection anchor point.

Energy Absorbing Lanyards

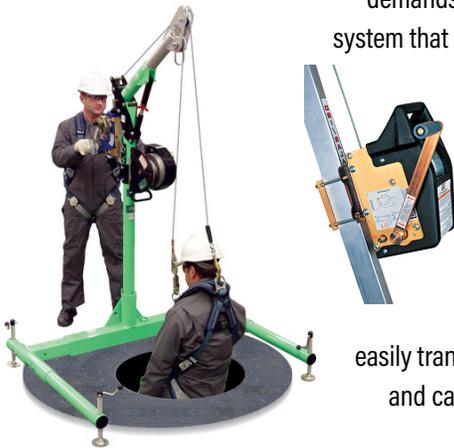

- Single Leg
- Twin Leg
- E4 Rated 100-254lbs
- E6 Rated 200-386lbs
- Snap Hooks
- EZ-Stop™ & Force 2™ Lanyards

Positioning Lanyards

- Rope, Web & Chain
- Fall Restricting Devices

FALL ARREST LANYARDS

Confined space entry and rescue at a job site demands a reliable and portable system that you can use in a variety of situations.

We stock a range of engineered confined space systems and tripods that can be easily transported from job-to-job and can be used with multiple devices.

Self Retracting Lifelines are the industry's most advanced fall arrester and range from 6 feet to 200 feet in length. Should a fall occur, a speed-sensing brake activates on the retractable lanyard, stopping the fall and reducing the forces imposed on the user to safe levels.

- Galvanized Line
- Stainless Steel Line
- Single/Twin Leg
- Fall Limiters
- RSQ Dual Mode with Rescue Capabilities
- Nano-Lok Edge

SELF RETRACTING LIFELINES

Controlled Descent Devices are used for a wide variety of elevated work areas when quick extraction from a dangerous situation is vital. We offer compact and lightweight solutions.

- Rollgliss® R250/R350/R500/R520
- Rescue Positioning Device (RPD)
- Rescumatic™ - Automatic Descent Controller
- Rollgliss Rescue Ladder

RESCUE & DESCENT DEVICES

Anchor Plates can be bolted or welded to your structure. We stock anchors for:

- Roofs
- Concrete
- Steel
- Specialty

ANCHOR PLATES

PRODUCT OVERVIEW

HERCULES

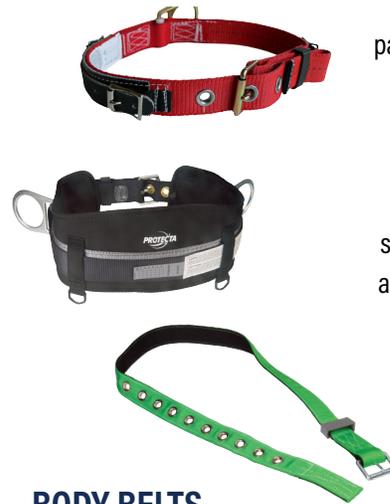

SLR INC.

SECURING • LIFTING • RIGGING

Anchorage Connectors are designed as the intermediary for securing a connecting device to an anchorage

Temporary Concrete Scaffold Choker
Web Tie Off Adaptor
Beam Connector
Cable Anchorage Connector

The body belt is an essential part of standard fall protection systems, and serves to keep workers secure and in place when attached to a safety line or other fall arrest system. Body belts come with adjustable and reinforced belt holes to fit most sizes.

BODY BELTS

ANCHORAGE CONNECTORS

Small and compact fall arrest system that can be used with a wide range of confined space retrieval equipment, such as davits and tripods. Ideal for extreme cases demanding a rescuer to be lowered head-first in a confined space.

Rescue kit includes: adjustable pole (adjusts from 6' to 12'), pole adapter for converting pole to hold remote hook, remote hook, storage bag
Rescue raising and lowering system with a 4:1 mechanical advantage.

Compliance in a Can.

All purpose Fall protection kit includes AJ47410 web 6 ft. (1.8m) tie-off adaptor, 1191995 FIRST harness, 1340005 rope adjuster with lanyard, 1204001 50 ft. (15.2m) lifeline and bucket.

ALL PURPOSE FALL PROTECTION KIT

FALL PROTECTION RESCUE KIT

A permanent vertical fall protection system for often accessed structures such as ladders, towers or tanks that allows the worker to move up and down the entire height of the system rather than having to disconnect and find new tie-off points along the way.

SERVICES OVERVIEW

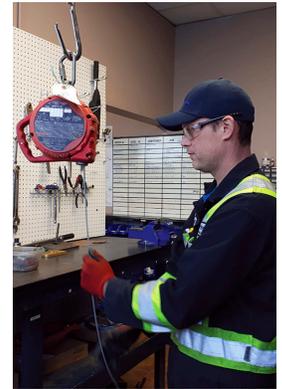

CERTTRACKER®

Our **FREE** web based, asset management program CertTracker® ensures you stay compliant and safe, reducing the total cost of ownership by easily allowing you to track your equipment requiring annual inspections, regular maintenance, inspections or certifications online.

INSPECTIONS AND REPAIRS

Our inspectors will ensure your equipment complies with industry standards and legislation. Staying on top of your required annual inspections has never been easier!

- We design, install and engineer lifelines
- We ensure equipment meets or exceeds industry standards
- Our technicians are certified and trained in the supply, inspection, repair and certification of fall protection systems

FALL PROTECTION TRAINING

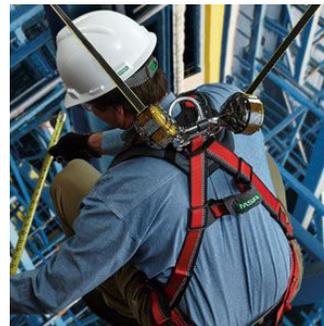

Hercules offers an extensive suite of high-quality safety training and certification courses. Whether you're looking for initial or refresher training, we provide practical, hands-on courses designed to exceed the minimum safety requirements. Our Fall Protection Programs include:

- Fall Protection Competent Person
- Health & Safety RollGliss Fall Rescue
- Confined Space Entrant & Attendant (CSEA)

CUSTOMIZED TRAINING

Our courses can be customized to fit your workplace's specific needs. We are always willing to design a course (or multiple courses) specifically for you. If you're interested in building a customized training program, or just want to find out more, please get in touch. Email us at: training@herculeslr.com, one of our training representatives will be happy to help you get started.

LOCAL SUPPORT - COAST TO COAST

Hercules SLR branches are strategically located across Canada in: Nova Scotia, New Brunswick, Newfoundland & Labrador, Quebec, Ontario, Alberta, British Columbia.
